Aniosyme Synergy WD Ultra

Ultra cleaning power for your cssd

Di-enzymatic detergent for ultra cleaning power

Aniosyme Synergy WD Ultra is the first combined ultra concentrate detergent for automated instrument reprocessing. The unique combined formula allows an adjustable pH-level from neutral to alkaline. Its di-enzymatic, silicate free formula offers excellent material compatibility with its unique low concentration.

- Combined neutral to alkaline pH-level formula
- Excellent cleaning performance starting from 0.03%
- Suitable above pH10 (at 1%) with any water quality
- Space saving – no more big canisters

Aniosyme Synergy WD Ultra

Di-enzymatic detergent for alkaline cleaning power

Aniosyme Synergy WD Ultra
5 L Canister

Aniosyme Synergy WD Ultra
20 L Canister

A unique formulation

- Combined neutral to alkaline pH-level formula
- Excellent cleaning performance starting from 0.03%
- Suitable above pH10 with any water quality

Chemo-physical data

• Density	20°C	1,158 g/mL
• pH value* (concentrate)	20°C	9,9
• pH value* at 0.03% (solution, 0.5 ml/l in DI water)	20°C	10,1
• pH value* at 1% (solution, 10 ml/l in DI water)	20°C	11,0
• Conductivity at 0.03% (solution, 0.5 ml/l in DI water)	20°C	100.7 µS/cm
• Conductivity at 1% (solution, 10 ml/l in DI water)	20°C	1421 µS/cm
• Viscosity (concentrate)	20°C	< 20 mPa/s

*pH value measurements under operating conditions always by means of a pH meter with temperature compensation.

Packaging and ordering information

Product	Packaging unit	Order code
Aniosyme Synergy WD Ultra Canister	2 x 5 L	xxxxx
Aniosyme Synergy WD Ultra Canister	1 x 20 L	xxxxx

Application area

Concentrated di-enzymatic detergent for instrument reprocessing. For the cleaning of surgical instruments and medical devices in automated washer disinfectors and tunnel washers. Medical Device. Ultra-concentrate solution for professional use.

Instructions for use

- For use in automated washer disinfectors and tunnel washers at an application dose of 0,05%, with a targeted range of 0,03 to 0,07%. If necessary, the dosing can be increased up to 1%.
- Effective from 5 minutes.
- Adapt the concentration, the contact time and the temperature of the dilution water according to the degree of soiling, the cleaning method used and the targeted pH-level of the cleaning phase.
- Maximum temperature: 60°C.

Ingredients

Surfactants, sequestering agent, enzyme complex (protease, lipase), excipients.

Storage

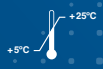
Dangerous – respect the precautions for use (drawn up according to the European rules in force regarding the classification and labelling of chemical products). Storage: between +5°C and +25°C.

Certificates

On demand we are pleased to provide you with certificates.

Medical device use safely

Please read label and product information.



FOR PROFESSIONAL USE ONLY.
